Disaster Recovery is Essential, but Don't Set It and Forget It

Business continuity and disaster recovery (BCDR) is essential for businesses in the modern age. However, there is more to BCDR than daily backups to an offsite server. It's often said in IT that an untested backup does not exist. It is not enough to have a data backup and a loosely defined response plan in place in the event of a disaster. Businesses should also consider the maintenance and management needs of BCDR servers and infrastructure. Implementing BCDR instrastructure and planning is only part of the battle.

This is where Managed BCDR from Tigunia enters. With Managed BCDR as part of Tigunia's Flexible Compute, you get you get a fully managed BCDR deployment, from the testing of your BCDR infrastructure, automated, bootable screenshots to confirm that your servers are predictively restorable, and guidance from experts every step of the way. We also assist in preparing reference material and disaster recovery playbooks to keep your internal response plan up-to-date and your team prepared.

Comprehensive Management

Peace of mind from knowing that your data is backed up andsafe

Cost predictability for the convenience of your organization

Experts provide your organization with your own internal resources

Bolster Your BCDR

Immutable Storage
Store your data in a safe place where it cannot be changed, affected, or altered by anybody. Unmodifiable data is locked down tight so that you can fully restore from any point.

Cost per Production Space
At a flat rate per server you use, Tigunia offers cost predictability and simplicity to our already-comprehensive security stack.

Multiple Copies, Multiple Locations
Your data exists in multiple places, both on-site and off-site, to help prevent data loss due to location-specific disasters.

Application Aware
Rest assured that your entire data set is protected by utilizing best in class application aware backup strategies.

Infinite Retention Rate
There is no amount of data that Tigunia cannot handle, and there is no limit on the number of backups that your organization may require. Tigunia can retain all of your data, and then some.

Fully Managed by Tigunia
True BCDR requires regular maintenance and overwatch. Let Tigunia take that off your hands and allow us to manage it all for you - true peace of mind.

Customizable Startegic BCDR Objectives

Tigunia's Managed BCDR offers a restore-time objective (RTO) of 8 hours, a restore point objective (RPO) of 30 minutes (which is how much data you lose), and retain 13 months of your data. We also offer options for as little as a 2 hour RTO, 30 minute RPO, and unlimited data retention.
