

Tigunia Shopify Integration

Tigunia Shopify Integration is a custom connector between Microsoft Dynamics 365 Business Central and the Shopify e-commerce platform that allows seamless connections between the two systems including customers, orders, shipments, returns, on-hand inventory and more.

With Shopify Integration from Tigunia, you can cut out the manual steps between your e-commerce shop and your Microsoft ERP system.

Sales, accounting, fulfillment, and operations will all thank you for streamlining the processes that support your online store, making their jobs easier and saving you manual data-entry delays and errors.

Tigunia Shopify Integration benefits include:

- ✔ *Order and inventory sync*
- ✔ *Customers and payment sync*
- ✔ *Shopify order management on Business Central*
- ✔ *Operational efficiencies for your sales, accounting and fulfillment teams*
- ✔ *Plug-and-play model allows for fast implementation – be up and running in just a few weeks!*

If you're tired of managing disparate e-commerce systems, manually entering data in multiple locations, and fixing problems and errors resulting from those issues, Tigunia Shopify Integration is here to make your life better.
