

## Simplify Your Royalties Management

Tigunia Royalties Management is an application for Microsoft Dynamics 365 Business Central that tracks item sales and automatically calculates royalties based on those sales. Just set up the brand structure for those items and enter the licensing agreements for those brands into contracts, and you're ready to start managing royalties in Business Central!

With Royalties Management from Tigunia, you can leave complicated royalties calculations and payment processing behind. No more digging through sales records and licensing agreements to calculate how many of a certain product sold or the agreed royalty amount for each sale. And best of all, skip data entry errors and wasting time processing refunds on erroneous payments with Royalties Management's seamless integration into Business Central accounts payable functionality.

## Expand BC's Capabilities

Streamline record keeping and licensing agreements.

Simplify your royalties tracking and reporting.

Easy to set up and manage.

## Get the Benefits You Need

- ✓ Unrestricted creation of brand structures and licensing contracts
- ✓ Seamless integration into the accounts payable functionality in Business Central
- ✓ Easily track where Items are sold from, and where they are sold to
- ✓ Calculate royalty payments and generate royalty invoices with a click of a button
- ✓ Automatic royalties tracking for every sales transaction
- ✓ Effortless royalty transaction export to Excel for flexible data analysis

**Leave the myopic, hard-to-use software behind.
