

Get Your Disaster Recovery Essentials

Small to mid-sized businesses create more data than ever. Accordingly, there is a need for robust solutions to back up that business-critical data. Successful and regular backups are the foundation for disaster recovery and business continuity. Without it, continuity and recovery cannot exist. Even continuous, offsite backup can only help so much if it is not properly designed. Worse, if the backup is not isolated from the rest of the production environment, it can get wrapped up in a ransomware attack, rendering the backup itself useless.

When you host your data with Tigunia, you can choose a backup solution that is equipped with 6 important attributes: comprehensiveness, ease of use, recoverability, performance and reliability, affordability, and scalability. This comes with the speed and rapid response you would expect from modern and reliable technology, ensuring that you recover extremely fast.

Complete Data Backup

Enjoy confidence from knowing that your data is protected

Industry-leading protection backed by professionals

Everything you need in a simple, self-service format

Comprehensive and Fast Recovery

Performance and Reliability

Eliminate your downtime and embrace a new level of peace of mind, knowing that Tigunia's methods provide a high level of performance and unprecedented reliability.

Affordability

BCDR is a vital tool for your business, but it should not cost a fortune. However, with the increasing price of digital insurance, Tigunia's reliable BCDR offers convenient cost predictability.

Scalability

Tigunia prides itself on its nearly limitless scalability. Whether you're a small team with slow growth or a large enterprise looking to expand further, Tigunia can serve your continuity needs every step of the way.

Comprehensiveness

There is no one-size-fits-all solution. With Tigunia, you receive a tailored combination of on-premises and cloud-based options that ensure you remain connected by eliminating downtime and offering total protection.

Ease of Use

Tigunia offers an easy-to-use, self-service interface that is supported by a team of experts with decades of combined experience.

Recoverability

With Tigunia, you will get instant recovery capabilities for your software and cloud-based systems. And if your hardware systems fail, users can rely on quick virtualization of failed systems to stay operational.
