tigunia Co-Managed IT Services

Supplementation for Any Existing IT Infrastructure

Co-managed IT Services from Tigunia provide clients access to a collaborative team of experts to supplement your existing IT infrastructure, increase efficiency and security, and maximize usability.

This partnership and integration extends your organization's IT expertise as much or as little as you need. The technology and environment belong to you, and each service is designed to provide stability and independence to empower your organization.

With co-managed IT services, the flexibility, scalability, and dependability of Tigunia is behind you.

Direct access to your existing
IT infrastructure

Shared access for seamless
co-management

Disaster recovery and
increased security

Partnerships that redefine the approach to business technology.

Use our services in correlation with your own. Use as much or as little of Tigunia's infrastructure as you need.
Technology should improve your organization, not complicate it.
