

Modern Applications with Unified Data

Dynamics 365 is exactly what you need to manage your entire business under one roof. Using modern applications that deliver new experiences and connect with any business's existing systems, it allows your organization to transform existing operating procedures and infrastructures. Integrate information from social networks, mobile devices, and micro-applications to drive intelligence and inform a more effective business process. You can confidently plan for the future of your business with mixed-reality applications and resources.

To make this process even more comprehensive, unified data and processes can enhance your business by eliminating silos. Centralized data enables disparate groups to work together effectively with a single, trusted view of processes, relationships, and data. Data connectors allow thousands of systems to bring their data to a single network.

Key Uses

Sales

Respond to changing business requirements with a flexible platform and rapidly deploy new solutions.

Finance and Operations

Increase your return on investment with Microsoft's agile and efficient cloud solution.

Service

Understand your customers better and respond quickly and effectively by accessing internal and external relationship data.

Intelligence in an Extensible Environment

Intelligence that delivers actionable insight and data in our current world must include social, relationship, and productivity information, in addition to data generated by business systems.

Unified Approach: The right solution allows companies to automatically leverage their data to decide and act in real-time with expanded analytics, predictive algorithms, and automated artificial intelligence.

Visibility: The right solution provides high-level management of your virtual team to coordinate faster and gain end-to-end visibility into sales and marketing efforts.

Change Enablement: The right solution is an extensible environment that makes it easy to evolve and extend existing business operations while introducing technologies that enable users to solve problems.

Get the right solution. Transform on your own timeline with Microsoft Business Applications that enable your team to do their best work. Gain actionable insights, thrive with solutions expressly built for change, and grow your business.
