

tigunia Jet Analytics and Reports

Reliable Analytics & Reporting from your Dynamics ERP Data

Access corporate business intelligence and reporting anytime, anywhere. Built on Excel, all you need is a spreadsheet and an internet connection to get all your financial and operational reports in a familiar, customizable format. Jet Analytics and Reports from Insight Software offers fast, flexible, and comprehensive reporting right within excel, no IT support required. These apps are built for Microsoft Dynamics NAV, GP and Business Central.

Whether you're brand new to Jet or have been using Jet for years, Tigunia is here to help. As North America's leading Jet partner, we can implement, service, and train you on your Jet Analytics and Reports environment to help get your business analytics and reporting where you need them.

Get any report exactly like you want it, fast analysis without technical expertise, and web collaboration that brings everyone together.

Why Jet Analytics and Reports?

Create custom reports & dashboards from your ERP with a simple drag-and-drop interface.

Click on any number and instantly get all the underlying data, so you always have the answers you need.

Combine multiple data sources into one easy-to-read dashboard. No coding needed.

What can you do with Jet?

With the Jet apps, you can get fast, flexible financial and operational reporting in Excel. You can export your Microsoft Dynamics ERP data straight to Excel, enabling you and your team to create self-serve custom data reports from multiple data sources.

Jet Analytics

- ✔ **Designed for users:** Remove any need to understand the underlying data structure when building high-impact dashboards inside Excel or Power BI.
- ✔ **Accurate data you can rely on:** Governed data for one version of the truth.
- ✔ **Rapid time-to-value:** Turnkey installation in hours with pre-built cubes, data warehouse, and dashboards.
- ✔ **Low cost of ownership:** User-friendly data preparation automation and data modeling tools to support all of your reporting and analytics needs that is five times faster than manual coding.

Jet Reports

- ✔ **Eliminate errors:** Access and pull all your data directly in Excel instead of copying, pasting, and manually exporting.
- ✔ **Cut reporting time and cost:** No more hard-coding or programming reports required.
- ✔ **Have the answers you need:** Drill-down on the numbers directly from Excel and access them anywhere.
- ✔ **Get started immediately:** Built specifically for Dynamics and installs in minutes with pre-built report templates to use on day one.
